Shares of stock can be issued in fractions.

Class	Number of Shares
Class A Primary Stock	3476

Class B Supplemental Agricultural Stock	100
Class D Direct M&I Stock	100

(1) Class A Primary Stock: Class A Primary Stock is issued to provide irrigation and livestock water to Shareholders. The water supply for Class A Stock is the natural flow of the Provo River as supplied by the Company's 1st Class and 17<sup>th</sup> Class water rights, respectively Award Paragraph 48(bm) (Water Right No. 55-11202) and 64(b0) (Water Right No. 55-11377) of the Provo River Decree (Civil No. 2888). In an average water year, the volume of water delivered under one Class A Share is up to 0.6 acre-feet ("AF") and ultimately determined by the proportion of Provo River flows available to the Company. The Company issues 5 Class A Shares per one acre of land in the Company's service area. One Class A Share is entitled to one vote on all matters Class A Stock is authorized to vote on. Class A Stock is not appurtenant to any parcel of land. Additional preferences and privileges associated with Class A Primary Stock are found in the Company's Bylaws.

(2) Class B Supplemental Agricultural Stock: Class B Stock is issued to supplement Class A Primary Stock and to approximate a full annual water supply for one acre of land. The water supply for Class B Stock is water stored in Jordanelle Reservoir and made available to the Company through a water sales with Wasatch County Special Service Area #1 ("WCSSA#1"). The Company shall issue .12 Class B Shares to supplement 5 Class A Shares. The annual amount of water delivered per Class B Share shall not exceed 1 AF and ultimately depends on the amount of water delivered under the Company's Class A Shares. Class B Shares are appurtenant to the parcels identified in the Subscription Contract. Additional preferences, privileges, and restrictions associated with Class B Supplemental Agricultural Stock are found in the Company's Bylaws.

(3) Class D Direct M&I Stock: Class D Direct M&I Stock is issued to provide water for municipal and industrial ("M&I") use. The water supply for Class D Stock is Project Water converted to M&I use at the request of WCSSA#1 and based on excess Project Water not needed for agricultural purposes anywhere in the Heber Valley or by any of the local irrigation companies (i.e. not based on request to convert individual Shareholder Subscription Contracts). Class D Stock water is stored in Jordanelle Reservoir and made available to the Company through a water sales contract with WCSSA#1 for M&I water. Class D Stock must be used pursuant to the terms of contracts with WCSSA#1, Central Utah Water Conservancy District, and the U.S. Department of the Interior. In an average water year, the volume of water delivered under one Share of Class D Stock shall be 1 AF. Shares of Class D Stock are non-voting. Holding Company shares does not grant the Shareholder a recognizable interest in or claim to the Company Water Rights or other assets of the Company.

**E. Place-of-Use.** The Place-of-Use for all Company Shares shall be coordinated with the Central Utah Water Conservation District staff in their role as the operator and manager of the Wasatch County Water Efficiency Project and, unless otherwise authorized by a water sales contract with WCSSA#1, shall be within the Company's Service Area.
